OPTI

ELECTRIC KETTLE - NON MIXING

GENERAL CHARACTERISTICS
- Nominal content: 150, 200, 250 and 300 litre
- Kettle bowl in 316 acid resistant steel, all other parts in 304 stainless steel
- Full welded, insulated kettle body with etched volume markings
- Working pressure: 1,0 bar
- Max. steam temperature: 120° C
- Adjustable, vertical control box with IPX6 protection class
- Integrated isolator switch
- Pressure gauge
- Tilting height: Min. 600 mm from floor to bottom of pouring lip
- Unheated top for lower energy waste and better comfort
- Hinged easy open/close lid with gas-spring and ergonomic lid arm
- Lid made from stainless steel
- Safety device to prevent tilting with a closed lid
- Electric tilt with adjustable TiltBack
- Error codes for user errors and appliance faults
- Maximum temperature on the outside of the kettlebowl after 3 hours cooking: <40°C
- Working height: 900 mm
- Automatic filling of water in the steam generator
- Spray gun

CONTROL AUTO TEMP 32
- Electronic control of the jacket temperature
- Timer for cooking time/hour
- Clock
- Electronic water flow meter with drip-free spout
- Access code can be selected
- Two sets of arrow keys for fast, precise setting

OPTIONS
- Connection for Power-Management-System
- Rotatable lid
- Drain valve/ Butterfly valve

VARIANTS
- Can be built together with Multi, MultiMix and OptiMix
- Mounting pillar to the left
