# HUPFER®

The Easy Clean – Norm 12 shelving system offers optimum cleanability and maximum hygiene. Upright posts and support bars are made from anodized aluminum while light weight shelf plates are made from polystyrene.

THE EASY CLEAN SHELVING SYSTEM IS:

- **Easy to assemble** – The individual segments of the polymer louvred shelf can easily be placed on the aluminum support bars.
- **Easy to adjust** – Depending on what you want to store, the individual shelves can be replaced and positioned without the need for tools, at any time, even after assembly.
- **Easy to clean** – To ensure maximum hygiene, the individual segments of polymer shelves can be thoroughly cleaned in a dishwasher. Plastic closure caps on upright posts keeps dust out.
- **Extendable** – Can be built around a 90° corner using corner hooks, no need for an additional upright – providing greater storage capacity, freely accessible storage areas and better use of space.
- **Rigid** – Cross braces on every third shelf section ensure that the whole shelving unit is stable.
- **Stable** – The captive, height-adjustable screw feet provided as standard compensate for any unevenness in the floor of up to 25mm. If the local conditions of the storage space require it, ceiling, floor and wall fastenings are available.
- **Flexible** – Bracing bars as an alternative to cross braces, for maximum access to the stored items from all sides when the shelving is mounted away from the wall.
- **Strong** – Polymer slatted shelf made from individual segments of heavy-duty polystyrene. Available with either slotted or solid shelves.

DIMENSIONS

Heights: 1200, 1400, 1600, 1800 & 2000mm

Widths: 600, 800, 900, 1000, 1200, 1400, 1500

Depths: 400, 500 & 600mm

TECHNICAL DATA

Maximum bay load: 600kg

Maximum shelf load with evenly distributed load:
600 – 1200 mm wide: 150kg
1400 – 1500 mm wide: 100kg

Temperature Range: - 40°C to 60°C

SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

The Easy Clean Shelving System is available in 4 tier (4T) and 5 tier (5T).
