

The Comenda GE series of pot and utensil dishwashers are reliable and tailored to specific user needs.

These high performance machines deliver maximum reliability and hygiene whilst requiring minimum maintenance. For kitchens and cafeterias the GE series utensil washers are perfect for cleaning pots, pans, containers and bowls of any shape and size.

For butchers, bakeries and food manufacturers, the GE series meets specialty requirements to clean those hard to remove stains and grease from bowls, whisks, hooks and pastry bags.
