DURABILITY THAT MAKES A DIFFERENCE®

# CARE AND MAINTENANCE

## Casters

Whenever the unit has been washed or steam cleaned the following maintenance should be performed on the casters:

- Grease swivel raceway of caster using a lubricant such as: **Lubriplate No. 930-AA, Keystone #84EPLXT Multi-Purpose Grease**, or the equivalent. Moving "O" ring or seal with finger and apply grease using a needle nose adapter on grease gun, or a tube type applicator such as "Sta-Lube" moly-graph assembly lube. (These can be obtained at most auto parts stores.)
- No lubrication is needed on casters with a bearing hub wheel. On casters using a nylon bushing at the hub, use a light oil such as **WD-40**.
- When done, check caster movement both in wheel spin and swivel rotation for any damage before returning to service.

## Camwear® (Polycarbonate) Cleaning Recommendation

To ensure that you get the longest possible service from your Slant Top Ingredient Bin Lids, we recommend the following cleaning products, *when used as directed by the supplier*. Please contact the supplier directly for questions on usage.
